

EASY ACCESS END CAP FOR HEAT EXCHANGE UNIT - FIELD INSTALL

\$360.00 USD

Plus Shipping

(Prices Subject to Change Without Notice)

The Easy Access End Cap for the Heat Unit can be used in two ways; for those extracting large volumes, the distributor and drive end is replaced by the Easy Access Cap. For those extracting at a lower rate, the distributor and drive end is switched to the honey outlet end with the Easy Access Cap put on the honey inlet end.

Note:

- The Easy Access End Cap comes standard on a new Heat Exchange Unit.
